

ProAlign is built on ESRI's ArcGIS, the world's leading GIS software

ProAlign provides a menu with a comprehensive set of territory alignment features

The screenshot shows the ProAlign 3.0 interface within ArcMap. On the left, a table displays territory data. In the center, a map shows a geographic area with territories color-coded. A menu is open over the map, and a bar chart titled 'ProAlign Chart' is visible in the bottom right corner.

Opt_Reg	Opt_Terr	TOTSALES	NUMCUST	Area
Opt_Reg1	Terr01	8622634	267	9,616.46
	Terr02	1873651	132	56,085.90
	Terr10	6864392	192	7,646.91
	Unassigned	0	0	0.00
	Total	17360677	591	82,161.88
Opt_Reg2	Terr03	2686511	96	7,985.87
	Terr04	4063117	165	1,005.58
	Terr05	3055853	148	91,249.54
	Terr06	4589114	163	3,341.40
